Gerber Collision and Glass was Founded in 1937 by Phil Gerber. They provide quality auto collision and glass repair service for more than 80 years to their customers. Gerber believes that your vehicle is your lifeline in many ways and more than just a possession. When there is an accident or damage to your vehicle, you want to know it is in the best hands. Their employees have extensive training at all levels and are a recognized name in the collision industry.

We have 3 locations that have experienced criminal activity, break ins and losses in my Region of Texas. This results in challenges by not having peace of mind when customers vehicles are in for repair, lost revenue, and potential reputation issues. As the Market Manager that oversees the West and Plains Region locations within Texas, I believe in having my customers vehicles safe.

I reached out to AMAROK to install their Electric Security Fence for the Lubbock, and the Amarillo Texas locations. AMAROK worked quickly to get the service installed to protect our customers vehicles. I have been completely satisfied with their security service. I can now have my General Managers and locations focus on revenue generating tasks as well as peace of mind regarding our level of security. I recommend AMAROK for any business that has security concerns. They have excellent service and respond quickly to our security needs.

Respectfully,

Charles Williamson
